PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building scalable, event-driven microservices for Tier 1 global telecom operators. Proficient in Java (Spring Boot), Go, and full-stack development with TypeScript, Angular, and VueJS. Experienced with cloud-native environments (Docker, Kubernetes, Kafka) and CI/CD pipelines (Jenkins, Git). Strong communicator with C1 English fluency, proven in international Agile teams across multiple time zones. Passionate about clean code, system reliability, and delivering high-impact solutions.

EDUCATION

Universidade Federal do ABC (UFABC), Bachelor's in Science & Technology	May 2022 – Sep 2027
Universidade Federal do ABC (UFABC), Bachelor's in Computer Science	May 2022 – Sep 2027

EXPERIENCE

Work & Travel – Technical Soft Skills Development , Black Tie Ski Rentals – Vail, Colorado, USA	Dec 2025 – Mar 2026
--	---------------------

- Operated in a high-pressure, fast-paced international environment serving a global clientele, achieving **C1 English fluency** and advanced active listening skills.
- Strengthened adaptability, rapid problem-solving, and cross-cultural communication – skills directly applicable to cross-functional engineering collaboration and client-facing technical roles.

Software Engineer , Netcracker Technology – São Paulo, SP	Mar 2025 – Dec 2025
--	---------------------

- Member of the inaugural Brazilian engineering team working on Netcracker's NDO (Network Domain Orchestrator) product, delivering OSS solutions for Tier 1 global telecom operators including Google Fiber, T-Mobile, and Rogers.
- Designed and developed scalable, event-driven microservices using Java (Spring Boot), Go, and Kafka, ensuring high availability and performance across distributed systems.
- Delivered critical client-specific customizations and full-stack automation fixes involving React, Docker, and Kubernetes on Netcracker's private cloud.
- Troubleshoot complex production issues in network lifecycle management systems, driving system stability and minimizing downtime.
- Collaborated with international cross-functional teams in a distributed Agile (Scrum) environment, contributing to sprint planning, code reviews, and CI/CD pipelines (Jenkins, Git).

Software Engineering Intern , Élin Duxus Consultoria – São Paulo, SP	Sep 2023 – Mar 2025
---	---------------------

- Developed and maintained web applications for a risk management consultancy using Java, Spring Boot, TypeScript, and JavaScript (HTML/JSP).
- Worked with multiple relational databases including PostgreSQL, MySQL, SQL Server, and Oracle, gaining solid expertise in data modeling and query optimization.
- Implemented asynchronous messaging with RabbitMQ to decouple services and improve system scalability.
- Led migration of a legacy VRaptor project to the Spring framework, improving maintainability and enabling modern CI/CD practices.
- Gained hands-on experience with deployment pipelines and integration testing in enterprise environments.

SKILLS

Languages: Java, Go (GoLang), Python, TypeScript, JavaScript, HTML, CSS, SQL.

Back-End: Spring Boot, Spring MVC, Hibernate, JUnit, REST APIs, Microservices, OOP, RabbitMQ, Kafka, Automated Testing.

Front-End: Angular, VueJS, JSP, HTML/CSS.

Databases: PostgreSQL, MySQL, SQL Server, Oracle.

DevOps & Tools: Docker, Kubernetes, Jenkins, Git, GitHub, CI/CD, Linux.

Methodologies: Agile (Scrum), Code Review, Event-Driven Architecture, Distributed Systems.

Soft Skills: Proactivity, teamwork, quick learning, time management, cross-cultural communication, problem-solving.

CERTIFICATIONS

- **Alura:** Java – Collections, Polymorphism, API Creation, Exception Handling
- **Alura:** Java – Object-Oriented Programming
- **Alura:** Java – Spring Boot 3: Developing REST APIs
- **Alura:** Java – Good Programming Practices
- **Alura:** Java – Microservices in Practice: Messaging with RabbitMQ and Kafka
- **Udemy:** Complete Java – Object-Oriented Programming + Projects

LANGUAGES

English: C1 Proficiency – Michigan English Test (MET)

Portuguese: Native
